Description

- **Colors:** red, blue, green, orange, purple, pink.
- **Size:** 10cm x 2.5cm
- Chalks for hair come with a unique applicator that allows you to simply brush the color wherever you want it to appear.
- You will no longer have to deal with complicated pens that fall out of your hair fast!
- You can apply the dye without gloves: gently dye the color from top to bottom.
- The chalk will leave your hair soft and manageable once applied, and not sticky and rigid like other products.
- Ideal for anyone who loves to show their individuality without the cost of expensive salons.

HOW TO USE:

Step 1: Spray a 1-inch section of hair with water. You do not need to soak all the hair, just apply the color in everything you want to paint.

Step 2: Twist the hair, color it with one of the chalks for the hair. I recommend choosing about three colors and putting one at a time in the hair. Start with the lightest tone first, and continue to the darkest.

Step 3: Wait for your hair to air dry.

Step 4: Using a curling iron, review each painted thread. This helps to set the colors in your hair, so it will last longer. Then brush and comb as you normally would!

COLOR INSTANTLY IN HAIR: Works very well with any hair color. The applicators give you a beautiful appearance. Easy to use at home. It is not necessary to visit beauty saloon.

HAIR INSURANCE: Thanks to the FDA approved ingredients, the premium quality temporary dye is completely washed with water and shampoo. Chalk is water soluble and non-allergenic. It will not damage the hair.

HAIR HAS A SOFT APPEARANCE: Even when a lot of color is applied. Apply the color, then brush your hair. Leaves a natural appearance, without waste.

This package includes 2 combs with dyes of the same color.

Notes:

1. Do not put it in the eyes.
2. It can be washed easily from the face.
3. It is better to wash the color before sleeping so as not to leave the color on the pillow.
4. It is easily applied on light hair, especially gray and blond. But it is a bit slower to dye your hair black or brown, so you need to repeat several times to get better results.
5. Do not apply in children under 3 years and pregnant women.
